

# Meeting Agenda

Location: 3211

Date: 10.03.25

Time: 08:00

Facilitator: Emil Djupfeld

Participants: Jonas Jacobsson & Christian Bergström

1. Objectives (5 min)

Have our UML designs and RAD “approved”. Ask some general questions about the SDD.

2. Reports (15 min)

Use cases, UML designs, improved RAD.

3. Discussion items (35 min)

How should the SDD be filled in? Should we start coding now? Can the winning algorithm be done in a general manner, or should we use one special case for our 5x5x5 board?

4. Outcomes and assignments (5 min)

We have to start filling in the SDD. Do some more medium and low priority use cases (from possible future extensions for instance). Get coding! A basic but working GUI should be done by next meeting.

5. Wrap up

Next meeting Thursday 10.04.15.
