

Meeting Agenda

Location: 3507

Date: 10-05-13

Time: 10:00

Facilitator: Jonas Jacobsson & Christian Bergström

Participants: Jonas Jacobsson & Christian Bergström

1. Objectives (5 min)

Progress report.

2. Reports (15 min)

The wrapper class has been figured out. The black void has been replaced with a nice background and some fog effect.

3. Discussion items (35 min)

With the wrapper class implemented the AI can be changed to work the way we originally intended. We should start doing this immediately.

4. Outcomes and assignments (5 min)

Start working on the “new” AI. Most of it should be easy to translate from the “old” AI and the Boards win functions. Keep tinkering with the renderer.

5. Wrap up

Next meeting: 10-05-18.
